Comments:	Date:

1. TITLE OF THE PROJECT PROPOSAL

Legend Tour & Travels

2. PROBLEM DOMAIN & MOTIVATIONS

This thing that motivated me to do this project.

- Learning FullStack website development
- Know deeper about HTML & CSS
- Learn About Hosting

3. OBJECTIVES/AIMS

Make a first and responsive web application that acquires modern web technology like

- HTML & CSS
- Javascript
- A Database

4. TOOLS & TECHNOLOGIES

This technology I'm going to use in this project.

- HTML & CSS
- Javascript
- ReactJs
- NodeJs
- MongoDB

5. CONCLUSION

In this project, I have built a website of a tourism-related website. To build this project I have used React and Bootstrap. On this website, the end-user can see the tour package offered by the tourism company. The end-user can click a specific tour to know more details and can book that tour if the user is logged in otherwise the user will be redirected to the login page. If the user is logged in then he/she can see the trips he/she booked for himself in the 'My Trips route'. If the user is logged in then he/she can see the tour booked by all users of the website in the 'Manage All Trips route'.
